Earth Science
Course Overview and Syllabus

Course Number: SC113  
Grade level: 6–8

Prerequisite Courses: None  
Credits: 1.0

Course Description

Students enrolled in this dynamic course will explore the scope of Earth sciences, covering everything from basic structure and rock formation to the incredible and volatile forces that have shaped and changed our planet. As climate change and energy conservation become increasingly more prevalent in the national discourse, it will be important for students to understand the concepts and causes of our changing Earth. Earth Science is a two-semester course that will provide a solid foundation for understanding the physical characteristics that make the planet Earth unique and will examine how these characteristics differ among the planets of our solar system.

Course Objectives

Throughout the course, you will meet the following goals:

- Describe the formation, identification, and utilization of rocks and minerals
- Explain methods for measuring geological time
- Describe the landforms found on Earth and the factors that have caused them to change over time
- Discuss the importance, availability, and use of Earth’s water supply
- Describe the use and conservation of resources
- Explain the impact of weather and climate on various regions of the earth
- Relate Earth to larger systems like the solar system, galaxies, and the universe

Student Expectations

This course requires the same level of commitment from you as a traditional classroom course would. Throughout the course, you are expected to spend approximately 5–7 hours per week online on the following activities:

- Interactive lessons that include a mixture of instructional videos and tasks
- Assignments in which you apply and extend learning in each lesson
- Assessments, including quizzes, tests, and cumulative exams
Communication

You are encouraged to communicate regularly with the school support staff through discussions, e-mail and online chat. We will regularly post system announcements. Instructors and academic success coaches are available during normal school hours to provide on-demand support.

Grading Policy

You will be graded on the work you do online and the work you submit electronically to your teacher. The weighting for each category of graded activity is listed below.

<table>
<thead>
<tr>
<th>Grading Category</th>

Scope and Sequence

When you log into the Virtual Classroom, you can view the entire course map, which provides a scope and sequence of all topics you will study. Clicking a lesson’s link in the course map leads to a page listing instructional activities, assignments, and learning objectives specific to that lesson. The units of study are summarized below:

Unit 1: The Planet Earth
Unit 2: Changing Earth
Unit 3: Earth’s Waters
Unit 4: Weather and Climate
Unit 5: Astronomy
